## **DETAILED ACTION**

### ***Specification***

1. The substitute specification, filed on 5/23/05, has been entered.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the steps of sending a polling command, the step of receiving a response, the step of communicating with the data storage device, as recited in claim 44, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

3. Claims 26-47 are objected to because of the following informalities: claim 26, line 10, "is capable of showing" should be replaced by "shows". Claim 27, line 3, after emitting, "an" should be replaced by "said/the". Claim 29, line 6, "pooling" should be replaced by "polling". Claim 36, line 2, "it can be" should be replaced by "it is". Claim 43, "can be" should be replaced by "are". Claim 44, line 8, "the position" should be replaced by "a position". Note that any claim whose base claim is objected is likewise objected. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 44-47 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 44 recites the limitation "the communication condition" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 44 recites the limitation "the presentation" in lines 6-7. There is insufficient antecedent basis for this limitation in the claim.

Claim 47 recites the limitation "the processing" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

Claims 45-46 are likewise rejected because of their dependency to rejected claim 44.

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

8. Claims 44-47 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 44 recites "the **communication condition** with the data storage device is presented... **the presentation being switched in accordance with the communication condition**". However, the specification, as filed does not provide support for such limitation as claimed. Claims 45-47 are likewise rejected because of their dependency to rejected claim 44.

***Allowable Subject Matter***

9. Claims 26-43 would be allowable if amended to overcome the objection sets forth above.

Art Unit: 2637

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
